ABOUT THIS PUBLICATION

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

CHANGES IN THIS ISSUE

There are no changes in this issue.

ROUNDING

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

INQUIRIES

More detailed information on each series, including explanatory and technical notes, can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

If you have any inquiries concerning this publication please contact Mark Parham, telephone Adelaide (08) 8237-7645.

For information about other ABS statistics and services, please refer to the back of this publication.

SOUTH AUSTRALIAN OVERVIEW

- Merchandise exports where the final stage of production was in South Australia were valued at \$377.8m in September 1997.
- The value of merchandise imports released from Customs control in South Australia were \$344.0m in September 1997, a 12.4% increase on the previous month.
- The trend estimate for retail turnover increased by 0.7% in September 1997.
- The trend for total new vehicle registrations increased by 0.8% in September 1997 and is the fourth month of increase after the recent low in May.
- The September 1997 trend estimate for dwelling unit approvals continued its downward movement with a 2.9% decrease from August.
- There were 7,465 short-term overseas visitor arrivals and 11,245 short-term departures overseas in August 1997.
- The trend estimate of employed persons in South Australia was 663,900 in October 1997.
- The trend unemployment rate has remained at 9.7% for six consecutive months.
- The number of industrial disputes recorded for August 1997 remained low, with South Australia accounting for less than 0.5% of the Australian total of 31,800 working days lost.
- The trend estimate of average weekly ordinary time earnings of full-time adult male employees has increased 1.4%.
- Total housing finance commitments (original figures including alterations and additions) increased 0.4% to \$262.6m in September 1997.
- Personal finance total commitments increased 6.8% to \$218.5m to give the highest recorded September figure.
- Total commercial finance commitments increased 47.5% to \$556.2m following the low August figure.

STATE ACCOUNTS

NOTE: Deficiencies in the data sources used to estimate gross operating surplus for recent quarters may at times lead to the current price estimates of gross state product GSP(I) being under or over stated for particular States. Consequently, the measured growth rate for constant price GSP(I) for those States will also be affected.

The constant price series for gross state product (GSP) have been labelled as 'experimental'. Users are cautioned that these estimates are derived indirectly by calculating a deflator from the expenditure components. It is emphasised that, at times, movements that can not be fully explained may be introduced into the constant price GSP(I) series through the use of this proxy deflator.

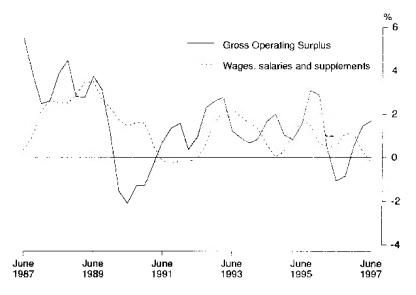

STATE ACCOUNTS continued

Trend estimates (current prices)

The trend estimate for GSP grew by 0.7% in the June quarter, a growth rate which has remained fairly constant for the past three quarters. GDP(I) for Australia increased 1.2% for the June quarter. South Australia has now been below the national rate for the past six quarters.

Contributing to the low June growth rate was a fall of 0.2% in wages, salaries and supplements. Growth through the year to June quarter 1997 was 2.2%, significantly below the national average of 5.6%.

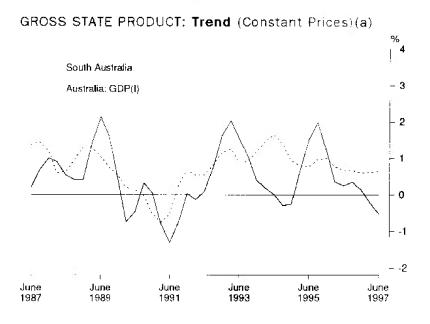

Gross operating surplus grew by 1.7% in the June quarter continuing an upward trend. The national average was 1.6% for the period. Indirect taxes less subsidies rose by 1.6% in the June quarter and by 2.6% through the year.

Trend estimates (constant prices)

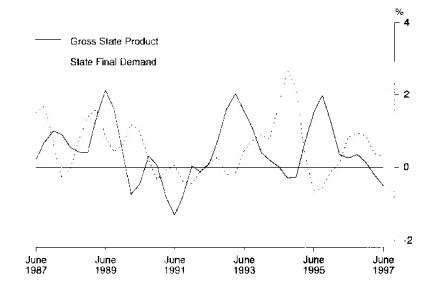

The experimental estimate of GSP at constant prices fell by 0.5% in the June quarter compared with an increase in GDP(I) for Australia of 0.6%. South Australia and Tasmania were the only States to record a decrease.

The annual growth rate in GSP at constant prices fell by 0.2% compared with the national increase of 2.6%. Tasmania (-1.4%) and the ACT (-1.0%) also recorded negative annual growth rates.

(a) Quarterly changes.

State final demand (SFD) increased by 0.3% in the June quarter and has, for the past five quarters, grown at a faster rate than GSP. Contributing to the modest increase in SFD was a 1.5% fall in public final demand, the largest fall for any State in the June quarter. The fall in public final demand reflects a large fall in gross fixed capital expenditure by public trading enterprises.

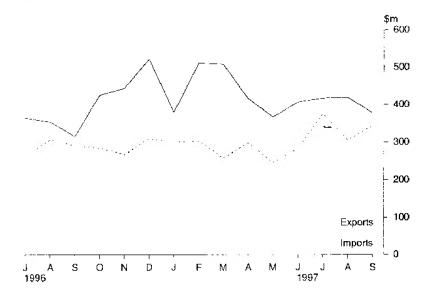

Private gross fixed capital expenditure increased by 1.5% in the June quarter (due mainly to an increase in dwelling and non-dwelling construction) and by 9.9% in the year to June quarter 1997.

INTERNATIONAL ACCOUNTS

Merchandise exports

Merchandise exports where the final stage of production was in South Australia were valued at \$377.8m in September 1997, a 9.7% decrease on August but a 19.6% increase on the same period last year. The major commodity groups exported during the month were wine \$61.9m, the second consecutive record month, metals and metal manufactures \$50.7m, and machinery \$38.5m.

The major destinations of South Australian exports in September 1997 were Japan \$73.6m and the United Kingdom \$43.4m. The reduction in the export of road vehicles, parts and accessories affected exports to the United States of America which decreased from \$80.3m reported in August to \$25.2m in September 1997. Exports to China also fell, from \$21.4m to \$10.9m whilst exports to the European Community remained high at \$78.5m.

Merchandise imports

The value of merchandise imports released from Customs control in South Australia were \$344.0m in September 1997, a 12.4% increase on the previous month and an 18.6% increase on September 1996. The increase in the importation petroleum and petroleum products up \$31.2m to \$61.1m and other manufactured goods up \$28.5m to \$81.3m were partly offset by a reduction in motor vehicles imports, down \$24.3m to \$57.9m.

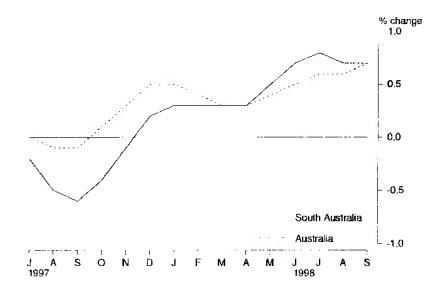

CONSUMPTION AND INVESTMENT

Retail turnover

The trend estimate for retail turnover rose by 0.7% in September 1997 and the growth rate has been around this level for the past 4 months.

Over the three months to September 1997 the trend estimate has increased by \$18.0m. The major contributors to this growth were food retailing (\$11.5m) and household good retailing (\$5.9m) which was partly offset by a decrease in hospitality and services (\$3.1m).

RETAIL TURNOVER: Trend

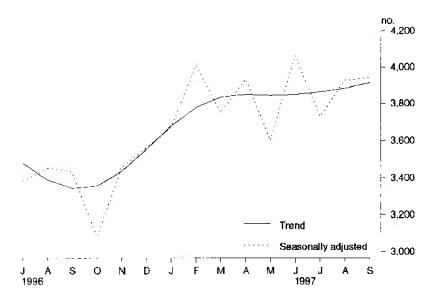

In original terms, South Australian retail turnover was \$784.5m, an increase of 6.0% on September 1996. The Australian turnover increased 7.2% to \$10,762.5m in the same period whilst the South Australian share of the Australian total was 7.3%.

New motor vehicle registrations

The trend for total new vehicle registrations increased by 0.8% in September 1997 and is the fourth month of increase after the recent low in May. The Australian trend rose for the twelfth consecutive month, with September 1997, 14.8% above September 1996.

In original terms there were 4,173 new motor vehicles registered in September 1997, an increase of 7.7% on August and a 21.4% increase on September 1996. For new passenger vehicles, the leading makes registered in September 1997 were. Holden (686 vehicles), Mitsubishi (656), Ford (621), Toyota (620), and Hyundai (213).

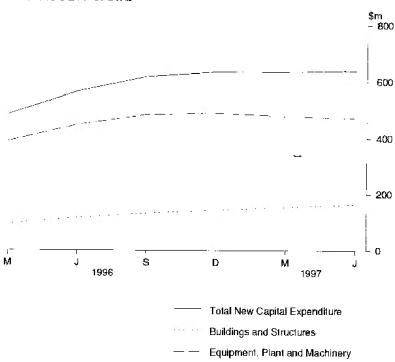

CONSUMPTION AND INVESTMENT continued

Private new capital expenditure

The trend estimate at current prices for private new capital expenditure for the June quarter 1997 rose by \$5m (0.8%) to \$639m. Expenditure on buildings increased by 6.4%, while expenditure on equipment fell by 1.3%. The Australian total rose by 2.9%.

Private new capital expenditure in original terms for the June quarter 1997 was \$720m. an increase of 32.1% from the June quarter 1996. Buildings and structures accounted for \$159m, and equipment, plant and machinery \$561m. For the financial year 1996–97, there was a 37.6% increase on the previous year, mainly due to the large capital expenditure by the mining industry, increasing from \$196m to \$488m.

TYPE OF ASSET: Trend

Tourist accommodation

When June quarter 1997 is compared with June quarter 1996, the number of rooms available in hotels, motels and guesthouses in South Australia was largely unchanged, with 10,842 rooms, 23 less than the previous year. The room occupancy rate fell marginally to 51.1%. Takings from accommodation increased by 3.2% from \$39.1m to \$40.4m with the average takings per room night occupied rising from \$77 to \$80.

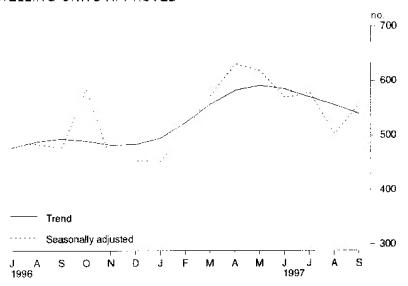

PRODUCTION

Building approvals

The September 1997 trend estimate for dwelling unit approvals continued its downward movement with a 2.9% decrease to 539 from August but was still 9.3% higher than the September 1996 trend estimate.

In original terms, the number of dwelling unit approvals actually rose 7.0% to 608 from the August 1997 figure of 568.

The national trend estimate for the total number of dwelling units approved is relatively flat with an increase of 0.8% over the last three months. For September 1997 the trend estimate (11,991) was 0.4% higher than for August and 11.8% above September 1996.

In original terms, South Australia accounted for 4.8% of the total dwelling units approved in Australia during September 1997.

The total value of building approved in September 1997 was \$121.4m of which \$52.3m was new residential building and \$58.4m non-residential building. Of the total value of non-residential building approved, Education accounted for \$22.7m, followed by Shops (\$11.1m), and Health (\$9.1m).

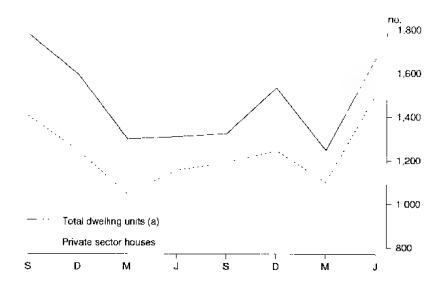

Building activity

The trend for the number of dwelling units commenced rose by 8.3% in the June quarter 1997. This follows a rise of 6.6% in the March quarter 1997 and was 17.9% above the level of a year ago.

In original terms, 1,670 dwelling units were commenced in the June quarter 1997, an increase of 423 or 33.9% from the previous quarter.

During 1996–97 there were 5,671 total dwellings commenced, a decrease of 4.8% from 1995–96. The number of new houses commenced fell by 1.1% to 5,014 and new other residential dwellings fell by 24.3% to 632.

DWELLING UNITS COMMENCED

(a) Includes conversions

The total value of building work commenced in South Australia during the June quarter 1997 increased by 51.2% to \$383.5m. This can be attributed to increases in both the residential and non-residential sectors of 33.8% and 70.3% respectively.

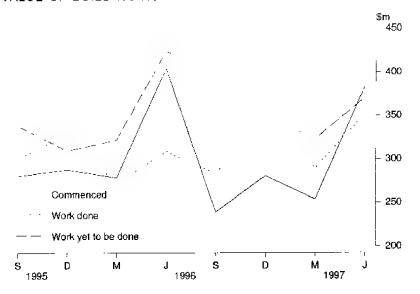

During 1996–97 1.157.0m of building work commenced in Australia. 7.4% less than the previous year.

For the June quarter 1997, the total value of building work done rose by 21.5% to \$351.4m. Nationally the value of building work done also recorded an increase, rising 45.6% to \$7.124.8m. For 1996–97, \$1,271.7m of building work was done in South Australia, 5.3% more than the previous year.

The total value of building work yet to be done in South Australia was \$370.4m, an increase of 14.7% from the previous quarter while the corresponding national figure increased by 1.0%.

Expressed as a proportion of the national total, the total value of building work yet to be done in South Australia was up 3.6% for the June quarter 1997 when compared with the previous quarter.

VALUE OF BUILDING ACTIV

Engineering construction

The value of engineering construction work done increased by 53.6% to \$307.7m for the June quarter 1997. South Australia had a 7.2% share of the national total of \$4,256.4m. The value of work commenced during the quarter increased by 23.3% to \$309.8m for South Australia while the corresponding national figure increased by 36.9% to \$4,513.7m. The South Australian proportion of national commencements was 6.9% for the June quarter 1997.

Manufacturing production

Note: The frequency of compilation and publication of Manufacturing Production has been reduced from monthly to quarterly. There is also a reduced range of data items collected on a State basis which impacts on the time series available in tables 15 & 16 of this bulletin.

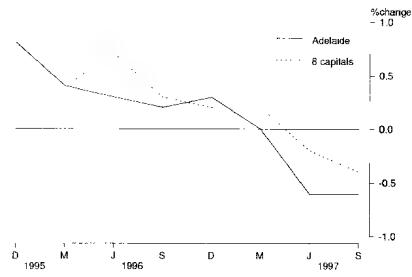

PRICES

Consumer Price Index

The Consumer Price Index (all groups) in Adelaide decreased by 0.6% between the June and September quarters 1997. This was the second consecutive quarterly decrease. Contributing most to the overall decrease for the September quarter were falls in the health and personal care, and housing groups.

The annual movement in the Adelaide index was a decrease of 0.8%.

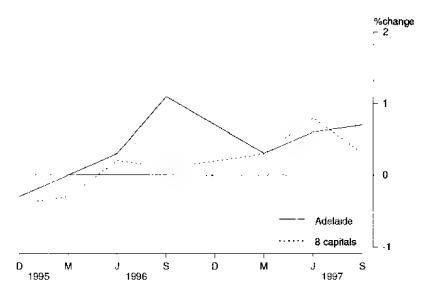

House building materials index

The Price Index of Materials Used in House Building rose 0.7% in Adelaide for the September quarter 1997. The increase can be attributed to rises in softwood and electrical cable. The weighted average of the six State capitals rose 0.3%.

For the year to September quarter 1997 the index increased 2.3% in Adelaide with the weighted average of the six State capitals increasing 1.5% for the same period.

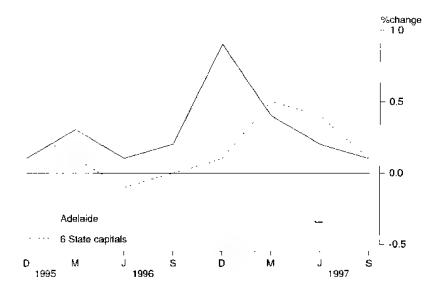

PRICES continued

Non-house building materials index

A rise of 0.1% in the Price Index of Materials Used in Building Other than House Building was recorded for the September quarter 1997 in Adelaide. Softwood. non-ferrous pipes and electrical cable were the main contributors to the rise. The weighted average of the six State capitals also rose 0.1% for the quarter.

For the year to September quarter 1997 the index increased 1.5% in Adelaide with the weighted average of the six State capitals increasing 1.2% for the same period.

House prices indexes

During the June quarter 1997 the Price Index of Established Houses in Adelaide fell by 0.3% and the Project Home Index decreased 0.7%. The weighted average of the eight capital cities index, over the same period showed a 1.3% increase for established houses and no change for project houses.

Over the year to the June quarter 1997 the Established House Price Index for Adelaide rose 1.0% whilst the Project Home Price Index fell by 4.6%. Nationally, the indexes showed a 2.8% increase and a 0.4% decrease respectively.

Passenger transport cost index

The Passenger Transport Cost Index measures changes in the costs of operating a public transport passenger bus service in Adelaide. Costs covered include labour costs, leasing charges, registration and insurance, repairs and maintenance, fuel and overheads. The index has been compiled on a quarterly basis from September 1995 with a base of 100.0 in 1993–94. The September quarter 1997 index was 108.2, a 0.2% increase from the June quarter 1997. The index showed a 3.9% increase in the 12 months to September 1997.

LABOUR FORCE AND DEMOGRAPHY

Population

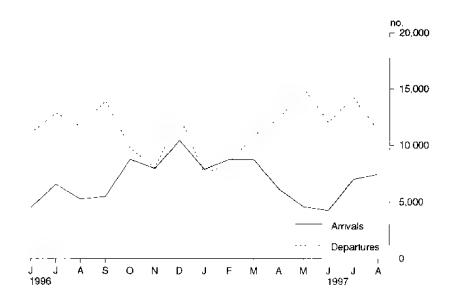

At 31 March 1997 the estimated resident population of South Australia was 1,478.689. This was an increase (1.916) persons from the December quarter. The continuing low growth for South Australia is attributable to an inflow of 1.228 persons, mostly offset by an outflow of 1,192 persons. In the March quarter there was a natural increase of 1,880 persons.

Short-term overseas visitor arrivals

There were 7,465 short term overseas visitor arrivals to South Australia in August 1997. This represents a 6.7% increase from last month and a 42.4% increase when compared with the same time last year (5,244). In contrast, arrivals to Australia fell by 16.8% when compared to July 1997, while a comparison with August 1996 reveals little change, an increase of 0.4%. South Australia accounted for 2.3% of short-term visitor arrivals in August 1997, up from 1.7% last month.

Short-term resident departures

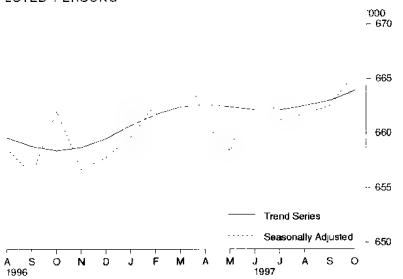

During August 1997 there were 11,245 short-term resident departures from South Australia, a fall of 3.3% compared with August 1996 (11,631). Departures also fell from July 1997, down 21.0%. In contrast, departures for Australia were 7.9% more than August 1996 (222,437), however they were 3.7% fewer than July 1997. South Australia's share of short-term resident departures fell to 4.7%, down from 5.7% last month.

Employment

The trend estimate of employed persons in South Australia was 663.900 in October 1997. This was 0.8% higher than the level (658,400) in October 1996. The main contributing factor has been a rise in part-time employment of 3.3% over the past 12 months.

Unemployment

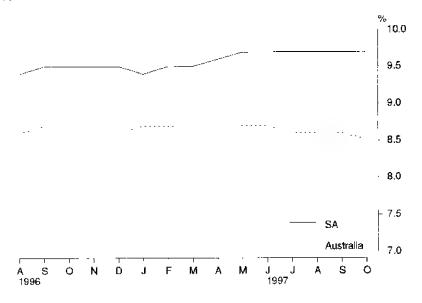

The October 1997 trend unemployment rate has remained at 9.7% and has been at this level for 6 consecutive months. Current levels are higher than the 9.5% recorded in October 1996.

At October 1997, the median duration of unemployment (one half of all observations lie above this value, and the other half below) was 38 weeks, higher than the 26 weeks recorded 12 months ago.

In original terms, the teenage full-time unemployment rate was 32.3% in October 1997, compared with 32.8% in October 1996. Recent levels are much lower than the April 1997 high of 42.7%.

The trend estimate of the unemployment rate for Australia has decreased from 8.7% in October 1996 to 8.5% in October 1997.

UNEMPLOYMENT RATES: Trend

LABOUR FORCE AND DEMOGRAPHY continued

Overtime

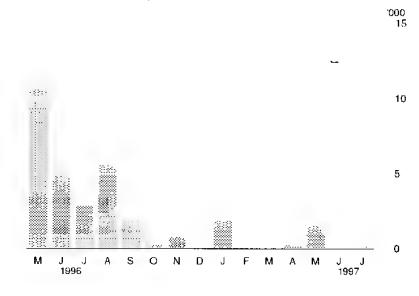

In original terms, the proportion of employees who worked overtime in South Australia in August 1997 was 16.7%. This was considerably higher than the August 1996 estimate of 14.3%.

In August 1997, employees who worked overtime in South Australia recorded an average of 6.0 overtime hours per week. This was lower than the 6.7 overtime hours recorded 12 months earlier.

ndustrial disputes

The number of industrial disputes recorded for August 1997 remained low, with South Australia accounting for less than 0.5% of the Australian total of 31,800 working days lost. For the year ending August 1997, the number of working days lost was 7,000, a large decrease from the previous year when there were 40,000 days lost through disputation.

WORKING DAYS LOST

INCOMES

Average weekly earnings

The trend estimate of average weekly ordinary time earnings of full-time adult male employees in South Australia has increased by 1.4% from \$695.10 in May 1997 to \$703.00 in August 1997. For females, the corresponding increase was less pronounced at 0.3% from \$582.30 in May 1997 to \$584.10 in August 1997.

Between May 1997 and August 1997, the trend estimate of average weekly total earnings of all employees (including part-time workers) in South Australia rose by 1.6% to \$545.70. Over the same period, the national level increased by 0.6% to \$583.60.

Note: Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

INCOMES continued

Award rates of pay

In the 12 months to June 1997, the weekly award rates of pay index for full-time employees in both South Australia and Australia increased by 1.4%.

Note: June was the last month of issue of this index. It will be replaced by a wage costs index, due for release in May 1998 and covering the December 1997 quarter. Non-wage costs, for example fringe benefits tax and payroll tax, will be added in consecutive stages to produce a composite labour costs index. This indicator should be available in early 1999.

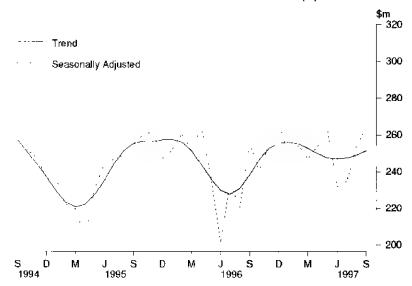

FINANCIAL MARKETS

Commitments for construction of houses rose 1.0% to \$251.6m in September reversing the previous downward trend. Commitments are now 5.5% higher than the previous September. Nationally the trend rose marginally, up 1.2% for the month to be 13.0% higher than the previous year. Seasonally adjusted, the value of commitments in South Australia was \$263.7m, up 3.7% for the month and up 3.5% on the previous September.

Total housing finance commitments (original figures including alterations and additions) increased 0.4% to \$262.6m, 2.7% below the previous September. The number of dwellings financed fell 1.7% to 3.034 coinciding with the rise in the average borrowing size of 2.3% to \$83,300. Nationally there was an increase in total new lending commitments of 5.1% for the month, 14.0% above September 1996.

Construction of dwellings increased 21.3% to \$35.7m, 53.1% above the previous September. The past six months have all been significantly above the corresponding months of the previous year. Commitments for newly erected dwellings were down 16.5% to \$6.8m, 18.7% below the previous September. Commitments for the purchase of established dwellings were up 1.1% to \$149.1m following four consecutive monthly decreases.

SECURED HOUSING FINANCE COMMITMENTS (a)

(a) Excludes alterations and additions. Includes refinancing.

FINANCIAL MARKETS continued

Refinancing fell 7.4% to \$61.1m, 10.9% below September 1996. Alterations and additions decreased 4.3% to \$9.9m to be only 5.8% of total new lending.

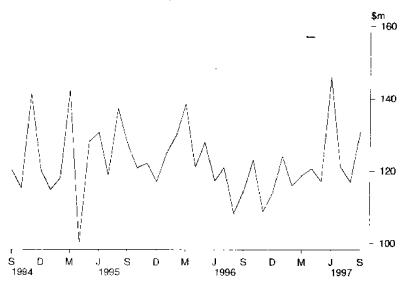

Personal finance

Total commitments increased 6.8% to \$218.5m to give the highest September recorded Nationally, total commitments fell 1.8%, but were 28.0% higher than September 1996.

Fixed loan commitments increased 12.1% to \$131.0m following falls in the past two months. The largest increase was for refinancing up 21.1% to \$20.2m to be 14.2% above the previous September. Used motor cars and station wagons, the largest category, increased 5.6% to \$38.1m, 7.7% above the previous September. The only falls were for household and personal goods (down 10.6%) and travel and holidays (down 8.8%).

Revolving credit facilities decreased marginally to \$87.5m while nationally the decrease was 7.0%. Unsecured credit facilities fell back again from the peak in July, decreasing 16.4% to \$37.0m, offsetting the gain in secured credit facilities which were up 16.1% to \$50.5m.

FIXED LOAN COMMITMENTS, All Lenders

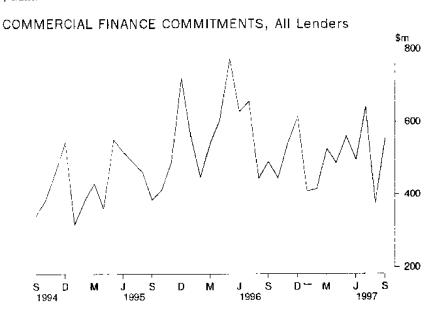

Commercial finance

Total commercial finance commitments increased 47.5% to \$556.2m following the low August figure. For the first time this year the monthly figure was higher than the corresponding month of the previous year. Nationally commercial finance commitments decreased 0.5% for the month but were 33.4% higher than the previous September.

Commitments under fixed loan facilities increased 24.2% to \$335.0m, the highest ever recorded for September. The main increases were manufacturing, up 58.5% to \$14.7m, property and business services, up 17.0% to \$35.6m, and other industries which more than doubled. Agriculture, forestry, fishing and hunting decreased 21.0% to \$25.5m, and community services decreased by over 50% for the second consecutive month.

FINANCIAL MARKETS continued

Revolving credit facilities doubled, reaching \$221.2m, following the lowest month since 1986. Increases of over \$44.0m were recorded for manufacturing which reached \$62.4m, and recreational, personal and other services which reached \$48.5m. The main falls were for construction, down 61.5% to \$3.6m and wholesale trade, down 58.9% to \$4.2m.

Lease finance

New finance lease commitments continued the downward trend from the June peak, with a marginal fall to \$21.9m. 1.6% below the previous September. The national total decreased 34.4% but is 27.9% higher than September 1996. South Australia's proportion of the national figure rose to 3.2%.

The main decrease in South Australia was electronic data processing equipment, down 63.5% to \$1.1m following two high months. New and used motor cars and station wagons not subject to depreciation also decreased significantly for the second consecutive month, new down 21.9% to \$4.4m and used down 25.8% to \$2.1m. The main rise was for office machines which increased 70.1% to \$7.3m, the highest recorded month.

FORWARD OUTLOOK

Composite leading indicator

The Composite Leading Indicator (CLI) is a single time series produced by aggregating eight individual economic indicators, and has been developed by the ABS as an experimental series to supplement existing forms of economic analysis and modelling.

The CLI summarises the early signals contained in a selection of economic indicators and is designed to assist the detection of turning points between successive expansions and slow downs of economic activity as measured by constant price GDP(A). It does not attempt to forecast the level of economic activity.

FORWARD OUT_OOK continued

In the June quarter 1997:

- the experimental CLI rose 0.10%, following rises of 0.18% and 0.20% in the December quarter 1996 and March quarter 1997 respectively.
- Of the eight components used in its compilation, five made positive contributions and three made negative contributions to the change in the June quarter 1997. The largest positive contribution continued to come from the production expectations, while the largest negative contribution was again from the (lagged) inverted real interest rate.

The quarterly data are released in more detail in the *Australian Economic Indicators* (Cat. no. 1350.0). The CLI was the topic of the Focus article in the September 1995 edition of *South Australian Economic Indicators* (Cat. no. 1307.4). A review of the performance of the CLI and its components was published in the July 1997 issue of Cat. no. 1350.0.

Australian business expectations

Surveys of business expectations have been available to decision makers for a number of years from several sources. These surveys provided *qualitative* indicators in the form of the net proportion of businesses expecting a rise or fall in future business conditions. Since the December quarter 1993, the ABS has been compiling a *quantitative* indicator of business expectations in the form of an expected weighted aggregate change in a range of economic variables. These data are available on a quarterly basis in *Australian Business Expectations* (Cat. no. 5250.0).

Short term—Businesses in South Australia expect an increase of 5.1% in sales of goods and services in the December quarter 1997 compared with the September quarter while the Australian expectation was a 3.0% increase. Nationally, sales of goods and services are expected to increase in all industries with the exception of electricity, gas and water which expects a decrease of 1.0%.

FORWARD OUTLOOK continued

Medium term—Businesses in South Australia expect sales of goods and services in the September quarter 1998 to be 4.8% above September quarter 1997. The Australian expectation was for 3.9% growth. The South Australian expectation of 4.8% was the largest of all States and Territories.

Expected new capital expenditure

State estimates of actual new capital expenditure by private businesses in Australia are compiled each quarter. Details appear on page 9, and in tables 1 and 10 of this publication.

Each December businesses in the survey are asked for details of their longer term expectations for capital expenditure by State enabling estimates to be made for periods 6 months and 18 months ahead of the reference period. The collection of expectations in the December quarter survey also allows the derivation of a composite estimate (6 months actual plus 6 months expectations) for that financial year.

The following table shows the forward estimates made with the December 1996 collection.

Once actual expenditure for a financial year is known, it is useful to investigate the relationship between previous expectations and the expenditure that was actually incurred. The resultant realisation ratios (subsequent actual expenditure divided by expected expenditure) then indicates how much expenditure was actually incurred against the amount expected to be incurred at various times of reporting.

Realisation ratios provide an important tool in understanding and interpreting statistics for future periods. The application of realisation ratios enables the adjustment of expectation data for known under (or over) realisation patterns in the past and hence provides a valid basis for comparison with other expectation data and actual expenditure estimates.

The following table shows the average realisation ratios over the past four years for the composite estimate (6 months actual and 6 months expected) and the 12 month expectation from the December quarter surveys.

FORWARD OUTLOOK continued

REALISATION RATIOS OF NEW CAPITAL EXPENDITURE

Selected industries	Composite	12 month
and type of asset	estimate	expectation
************		er on the error of
Mining	0.88	1 18
Manufacturing	0.97	1 06
Other	0.98	1.58
Total expenditure	0.96	1.25
Buildings etc.	0.96	1.53
Equipment etc.	0.96	1.19

For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

ABS Products and Services

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

National Dial-a-Statistic Line

0055 86 400

Steadycom P/L: premium rate 25c/20 secs.

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

Internet

http://www.abs.gov.au

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators. ABS product release details and other information of general interest.
